

2014 Registry Report

Northwestern Lake Forest Hospital

The Northwestern Lake Forest Hospital Tumor Registry, under the direction of the Cancer Committee, is a key component of the Community Comprehensive Cancer Program. The registry collects, maintains and disseminates detailed patient data required for reporting to the State of Illinois Cancer Registry, The Commission on Cancer National Cancer Data Base and hospital locator data base. This data is vital in the evaluation of patient treatment, cancer incidence and outcome reporting. The registry has a reference date of 2000 and we follow 7,900 patients annually.

2014 Registry Activities

We added 701 cases to registry. Coordinated forty-two Cancer Conferences and continued maintaining the CME attendance and reports for both Tumor Board and Breast Conferences for Feinberg School of Medicine.

TOP 10 SITES FOR 2014

MALE AND FEMALE	Northwestern Lake Forest Hospital (n=531)	United States* (n=1,166,270)
Breast	50%	20.2%
Prostate	9%	20.0%
Lung	9%	19.2%
Melanoma	4%	6.5%
Lymphoma	4%	6.1%
Thyroid	4%	5.4%
Bladder**	4%	6.4%
Colon	6%	8.3%
Rectum	2%	3.4%
Corpus Uteri	8%	4.5%
	100%	100%
